

Initial Situation

The ATOS Klinik has been around for almost two decades and offers its patients top-quality medicine and outstanding service. This also includes cutting-edge technology, both in treatments and in the infotainment area.

ment area.

After all, good entertainment contributes to wellbeing and a more rapid recovery. Thus the existing television system was to be replaced by innovative IPTV, including individual monitors at the patients' beds.

Requirements

The patients' rooms were to be equipped with modern IPTV (Internet protocol television) during the course of rebuilding work at this private hospital in Heidelberg. At the same time, during the expansion it was necessary to fall back as far as possible on the existing network; this was to avoid costly cable-laying.

Furthermore, they wanted to offer patients individual, top-quality infotainment through their own monitors. Intuitive handling through simple menu navigation was a re-

quirement, as was the option of increasing the IPTV system.

Result

The ATOS Klinik in Heidelberg accessed the Macnetix IPTV system when equipping a total of 15 rooms (28 beds). Each patient now has his/her own monitor, and a Be-watec LCD flat-screen, which can be operated intuitively using a simple menu bar.

The software company Macnetix took on the hardware configuration as well as control through a central management system, which manages the content.

And what are the benefits for the clinic? The hospital management agrees on which programs are to be shown. In addition, the system can be expanded through an Intranet interface to include additional content such as physiotherapy exercises or the current food menu.

Currently, patients receive almost 60 radio stations and television programs, all of which are in the best digital quality.

Furthermore, it is possible to welcome patients in their own language and to reserve individual program places according to the nationality of the guest.

Macnetix

Since 2000 we belong to the companies, which nationally and internationally successfully offer hardware and software solutions in the area of information and advertising.

We implement customer-specific projects

and openly confront new challenges. Among others we have already developed industry solutions for hotels, banks, restaurants, schools, universities, research institutes and energy supply companies.

We are especially distinguished by our professional competence and our satisfied customers.

IPTV

Boris Stalf,
IT-Manager of
the ATOS Klinik:

„Macnetix IPTV is versatile and extensible at will. We are persuaded of this progressive technology and also want our partnerhouse in Munich as well as our waiting area to be equipped with Macnetix IPTV.“
