

This type of control unit is a small, compact device that can be mounted resp. integrated easily due to its very small dimensions e.g. behind the screen or in wall panelling. The special construction of this PC makes it very quiet and it requires little service.

A further advantage is its impressive computing power. The mini-PC can be upgraded with a wireless-lan card in spite of its small size, and is adequate for the use in very flat positions.

Features:

- | | | |
|---|--|---------------------------|
| - H 166 mm x L 164 mm x B 4860 mm | FSB and nVIDIA ION Technologie | - 120 GB HDD |
